About the presenter

Since 2005, Dr Marina Hurley has specialised in teaching scientific and professional writing through her *Writing Clear Science* training research consultancy. Prior to 2005, Marina worked as an ecological scientist for 20 years. Marina is Visiting Fellow at UNSW teaching PhD students. Based in Melbourne, Marina regularly travels across Australia delivering workshops. au.linkedin.com/in/marinahurley/

Overview

Scientific reports and papers are structured to suit the reader, the author and the type of project you are writing. Through the half-day *Structuring Reports & Papers* workshop, we show you what you need to write in each section of your document. The workshop includes practical exercises that allow you to work on your own project(s).

Learn how to

- Structure your report according to your organisation, company guidelines or
- Structure your research paper according to your journal's requirements.
- Align your project design with your document design.
- Decide what format, and in what section, to present your information and data

What you take away

- Improved report and paper writing skills
- A rewritten draft of your own work that you complete during the workshop (optional)

Resources provided

- The *Writing Clear Science* workshop handbook
- A workshop participation certificate
- Worksheets and templates for future use
- Recommended reading list
