About the presenter

Since 2005, Dr Marina Hurley has specialised in teaching scientific and professional writing through her *Writing Clear Science* training and professional writing consultancy. Prior to 2005, Marina worked as an ecological scientist for 20 years. Marina is Visiting Fellow at UNSW teaching PhD students. Based in Melbourne, Marina regularly travels across Australia delivering workshops. au.linkedin.com/in/marinahurley/

Overview

Through the half-day workshop *How to Structure a Research Paper*, Dr Marina Hurley shows you what to write in each section of your research paper, with particular attention paid to the *Introduction* and *Discussion* sections. We also cover the steps necessary to get your paper published. The practical exercises allow you to work on your own project and to produce a content-rich first draft.

Learn how to

- Structure your research paper according to your project and journal requirements
- Structure your Abstract, Introduction and Discussion
- Decide what literature or information should be included to strengthen your findings
- Avoid common mistakes that cause papers to be rejected for publication

What you take away

- Improved paper writing skills
- A draft outline of a paper Introduction, Discussion or Abstract

Resources provided

- The *Writing Clear Science* workshop handbook (lecture notes & exercises)
- A workshop participation certificate
- Worksheets and templates for future use
- Recommended reading list

When & where is the next workshop?
